Brazilian Association of Mechanical
Engineering and Mechanical Sciences

28th INTERNATIONAL CONGRESS OF MECHANICAL ENGINEERING

*ARTIFICIAL INTELLIGENCE FOR
A SUSTAINABLE TOMORROW*

**9th - 14th NOVEMBER 2025
CURITIBA - PR | BRAZIL**

UFPR | UTFPR | PUCPR

Join us in Curitiba for COBEM 2025 as we explore the future of mechanical engineering, fueled by innovation and driven by sustainability.

About COBEM

COBEM, the International Congress of Mechanical Engineering, is the most important event organized by ABCM. Since its first edition in 1971, it has become Brazil's leading forum for mechanical sciences and engineering, attracting participants from academia, industry, and research institutions.

The 2025 edition will take place from November 9 to 14 at the Federal University of Paraná (UFPR), in Curitiba, with the theme **“Artificial Intelligence for a Sustainable Tomorrow.”** The event will include plenary sessions, technical presentations, poster sessions, mini-courses, and special activities like the Scientific Communication Contest and the Pitch Day for startups.

Highlights include the **International Symposium ICONNE**, focused on nonlinear and chaotic phenomena, and the **Exhibition of the Industrial Park of Paraná**, promoting innovation and collaboration between academia and local industry.

COBEM gathers around 1,500 participants and 1,200 contributions each edition. In 2025, it will also celebrate the **50th anniversary of ABCM**, honoring its legacy and the professionals who have contributed to the advancement of mechanical sciences in Brazil.

More than a conference, COBEM is a hub for knowledge exchange, innovation, and collaboration in mechanical engineering.

16 Keynote Lectures for a Rich Academic Exchange

Prof. Álvaro Toubes Prata
UFSC (Florianópolis, Brazil)

Prof. Hervé Panetto
University of Lorraine (Nancy, France)

Prof. Ibrahim Dincer
Ontario Tech University (Oshawa, Canada)

Prof. Juan Carlos Ordonez
Florida State University (Tallahassee, USA)

Prof. C. Nataraj
Villanova University (Villanova, USA)

Prof. Sylvie Lorente
Villanova University (USA)

Prof. Marco Cecarelli
University of Rome “La Sapienza” (Rome, Italy)

Prof. Emilia Villani
ITA (São José dos Campos, Brazil)

Prof. Daniil Yurchenko
University of Southampton (Southampton, UK)

Prof. Joseph Shepherd
Caltech (Pasadena, USA)

Prof. Norman Fleck
IUTAM / University of Cambridge (Cambridge, UK)

Prof. Américo Scotti
UFU (Uberlândia, Brazil)

Prof. Gherhardt Ribatski
USP-São Carlos (São Carlos, Brazil)

Prof. Navneet Khanna
IITRAM (Ahmedabad, India)

Prof. Sandro Campos Amico
UFRGS (Porto Alegre, Brazil)

Prof. Paul Wofo
University of Yaoundé I (Yaoundé, Cameroon)

What to Expect from COBEM 2025

COBEM 2025 brings an intense and inspiring week of activities that combine cutting-edge science, technology, and networking in mechanical engineering.

The pre-opening event is the **“Pitch Day” on Saturday (Nov 8)** — a dynamic competition where startups and innovative projects are evaluated, followed by an outdoor celebration with live rock bands, food trucks, and cultural attractions.
