Cable Dynamic Modeling and Applications
Sebastião C. P. Gomes, Eliziane B. Zanela, Adriana E. L. Pereira
VIBRATIONS AND STRUCTURAL DYNAMICS

Optimum design of a set of dynamic neutralizers to passive vibration control considering physical parameters, location and viscoelastic material variables
José A Costa Baptista, Roberto Aizik Tenenbaum, Filipa Onhua Taminato
VIBRATIONS AND STRUCTURAL DYNAMICS

Control of multiple mobile robots in dynamic formations
Guilherme Rinaldo, Elvira Rafikova, Marat Rafikov
ROBOTICS AND MECHATRONIC SYSTEMS

Analysis of the dynamic behavior of a cracked rotating shaft by using the harmonic balance approach
Aldemir Apace Cavalli, Jr, Tobias Souza Morais, Nobu Ichikawa, Valder Steffen Jr
VIBRATIONS AND STRUCTURAL DYNAMICS

Effect of mistuning on the harvested energy from a nonlinear system with weak coupling
M. Ghandchi Tehrani, 1, N. Kacem, N. Bouhaddi
NONLINEAR DYNAMICS

Response of bicycle model, three 3 DOF and multibody simulation compared with experiments on track and determination of their limits of utilization
Rafael Fernandes Pinheiro, Diego Colón
CONTROL OF MECHANICAL SYSTEMS

A numerical methodology for designing a viscoelastic vibration neutralizer with tubular geometry and constrained layers
Igor Fernando Rodrigues, Eduardo M. D. Lopes, Júlia Tomás Pereira
VIBRATIONS AND STRUCTURAL DYNAMICS

Active Control of Drill-string torsional dynamics
M. T. Shankar, T. G. Ritthu
CONTROL OF MECHANICAL SYSTEMS

Use of Passivmaterial in Energy Harvesting Systems as Sensors and Actuators
Alme S. De Paula, Marcelo A. Sawicki, Wladimir Ch. V. Barros, Tiago L. Pereira, Adriano T. Fabris
SMART MATERIALS AND STRUCTURES

Passive control of noise propagation in tube systems using Bragg scattering
Vinicius De Sousa Lima, Joao Carlos Morais, Emanuel Moultinho Coneneto, Jose Evandro Garcia de Medeiros, Thais Soledad Calero, Walter Jesus Paucar Casas
VIBRATIONS AND STRUCTURAL DYNAMICS

Identification of rotaryneutralizing seal coefficients by means of impedance matrix and an optimization strategy
David I. G. M. Tl, Thiago G. R. B, Fernando A. N. C. P. J
ROTORDYNAMICS

An application of Lur'e problem in Hopfield neural networks
Rafael Fernandes Pacheco, Diego Colón
CONTROL OF MECHANICAL SYSTEMS

Analysis of the dynamic behavior of a cracked rotating shaft by using the harmonic balance approach
Aldemir Apace Cavalli, Jr, Tobias Souza Morais, Nobu Ichikawa, Valder Steffen Jr
VIBRATIONS AND STRUCTURAL DYNAMICS

Effect of mistuning on the harvested energy from a nonlinear system with weak coupling
M. Ghandchi Tehrani, 1, N. Kacem, N. Bouhaddi
NONLINEAR DYNAMICS

Response of bicycle model, three 3 DOF and multibody simulation compared with experiments on track and determination of their limits of utilization
Rafael Fernandes Pinheiro, Diego Colón
CONTROL OF MECHANICAL SYSTEMS

Dynamic Characterization and Efficiency Analysis of Multi Degree of Freedom Passive Energy Harvesters from Structural Vibrations
Alcoi Hanevall, Paulo S. Vareto
SMART MATERIALS AND STRUCTURES

Influence of viscoelastic damping on the dynamic response of nonlinear aeroelastic systems
Matheus Ingugiuza Nora Rosival, Jus Roberto de Freitas, L. M. de Souza, Maximo Szaizen
VIBRATIONS AND STRUCTURAL DYNAMICS

Nonlinear identification using polynomial narmax model and a stability analysis of an aerelastic system
Raphaela Carvalho Machado Gonçalves, Elvise Barrosa, Lúcio Carlos Souza de Souza, Armin Nabarette, José Manoel Baltuan, David Fernando Castilho Z. Z
VIBRATIONS AND STRUCTURAL DYNAMICS

Dynamic Behavior and Optimization of Composite Towed Stabilized Plates
Thiago A. M. Gm, Mauro S. V. Domoniz
SMART MATERIALS AND STRUCTURES

Dynamic Models for Transmission Lines and Hoses
Petter Krus
ROBOTICS AND MECHATRONIC SYSTEMS

Aerelastic response of shape memory alloy hybrid composite cylindrical shells under supercritical flow
Alfred R. de Faro, Mauro V. Donnini
SMART MATERIALS AND STRUCTURES

Stochastic Analysis of Vortex Induced Vibrations Using a Reduced Model
Gabriel R. Lemos, José Barbosa, Ricardo A. Rocha
VIBRATIONS AND STRUCTURAL DYNAMICS

Dynamics of a Hovercraft Autonomous Vehicle
Vagner Cândido de Sousa, Carlos De Marquão Junior, Mohamad Elahi
VIBRATIONS AND STRUCTURAL DYNAMICS

The Influence of Random Forces on the Vibrational Behavior of a Single-Phase Transformer
Alfredo de Moraes, Fabio Scalise, Agostino de Toledo Faria, Max Kotschenreuther
VIBRATIONS AND STRUCTURAL DYNAMICS

Robust control of multiple mobile robots in dynamic formations
Guilherme Rinaldo, Elvira Rafikova, Marat Rafikov
ROBOTICS AND MECHATRONIC SYSTEMS

Assessment of uncertainties and parameter estimation in offshore gas pipeline
Elvire Raffit, Jorge Luis Balbi, Andrés Hernández, Fabio Scalise
UNCERTAINTY QUANTIFICATION AND STOCHASTIC DYNAMICS

Dynamics of a Hovercraft Autonomous Vehicle
Vagner Cândido de Sousa, Carlos De Marquão Junior, Mohamad Elahi
VIBRATIONS AND STRUCTURAL DYNAMICS

Android based sensor fusion and control navigation strategy for a wheeled mobile robot
Marcelo Rodrigues de Souza, Elvira Rafikova
VIBRATIONS AND STRUCTURAL DYNAMICS

Modelling and simulation of the rolling dynamics of a tractor-trailer truck vehicle
Ricardo Sampieri, Flávio Celso Trigo
VEHICLE DYNAMICS AND MULTIBODY SYSTEMS
